University 2017 - 2021	NATIONAL CHUNG CHENG UNIVERSITY Bachelor of Information Management @Taiwan 🇹🇼

WORK EXPERIENCE

 Software Engineer- MES IT 2021 - 2023	Semiconductor Industry - Manufacturing System <ul style="list-style-type: none">- Worked in the MES-OPS team, was engaged in two main projects.- Scheduling System Database Extension project: Aimed at reducing the loading on the existing MSSQL server in the production environment. I successfully reduced the server loading by 30% and increased the performance of the service.- Physical server to VM project: which aimed to reduce the cost of maintaining physical servers and increase resource efficiency.- Developed a tool using Python and SQL to validate user's input. This involved handling data requested from the MSSQL server and validation.- Used Power Automate to automate routine jobs and improve my working efficiency.- Used TFS to deploy quality releases while supporting the QRM team. In that period, I practiced the concepts of DevOps and CI/CD.
 Full Stack SWE Apr 2023 ~	FinTech Startup - AI Web Applications <ul style="list-style-type: none">- Developed a product to recognize content in document by LLM.- Handling both front-end and back-end requirements.- By using Vue, Typescript and Quasar to develop front-end web app. Focusing on UI/UX development, building reusable components and using Axios to fetch data.- Fetching data from MSSQL by SQL and using C# to establish Back-end API- Version Control with Gitea / GitLab and implement Scrum with Jira Tools: Vue , Typescript , C# , SQL

SIDE PROJECT
