PHOTOGRAPHY & FILM MAKING

THE PLACE TO LEARN WHAT I WANT

In the three years university life, I learned three programming languages, web designing, accounting, management, etc. Besides, I also involved in the courses which provided by Department of Communication. Those courses gave me a great chance to put into practice.

ELECTRIC MOTO-BIKE RENTING SYSTEM

I am responsible for the operation services in this start-up team. Since our university campus is large, we see it as an opportunity to introduce shared motobike to our schoolmates so as to save their time and effort climbing up the slopes.

ENTER THE SECOND ROUND OF ATCC

ATCC as the most representative national business competition, joining it is on of my university wishlist. In this competition, we provided a business proposal for Taiwan Bar(a digital media firm). In this competition, we aim at creating a new business model for digital media firm and increasing the content engagement to target audiences.

CLASSIFY CLOTHING CATEGORY WITH TENSORFLOW

I am the captain of this project team. The target of this project is using compter vision to classify costumers' clothing attributes. After that, we will use these attributes data for predicting the garment products which costumers will be interested. We used Inception-V3 model from google Tensorflow to do the classification.

BROADEN MY HORIZONS

The experience in this company is really interesting. We were developing a SaaS for education industry. As the assistant of PM, I did market survey, the test specifications and even developed the webpage for promoting our SaaS product.

HONG KONG NATIONAL BASEBALL TEAM & JUNIOR SQUAD

MV: MOTIV - 在身邊 | By My Side
SHORT FILM: 窗外的黑羊
